I prefer the stuff by Richard Freer on Civ Pro. Much more in line with the way my Professor taught and seems to outline the concepts/black letter law better. The Understanding series was tossed aside after two chapters because it has a lot of unnecessary fluff and read a lot like the casebook. The purpose of a hornbook is to provide a simpler and more concise breakdown of the concepts. This Understanding guide didn't do that. 1 of 1 people found the following review helpful. Lived on this book By Conan My civ pro professor is one of those professors who understands the subject well himself but does a horrible job imparting his knowledge, so I had to rely on commercial supplements. One of the supplements I relied on was this book and it is absolutely gorgeous. The content is structured well and (I think) should be compatible with the syllabus of most professors, and the author writes in a style that is easily comprehensible by a normal human being. I highly recommend it! 0 of 0 people found the following review helpful. Five Stars By Melb Martin Great.*
